PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building scalable web and fintech applications using Next.js, React, Node.js, and Python (FastAPI). Recently promoted to Senior Software Engineer at Raptr Games for consistent delivery on production fintech and e-commerce systems. Skilled across frontend, backend, and API design, with hands-on experience in payment integrations, database architecture, and cloud deployment.

EXPERIENCE

Senior Software Engineer | Raptr Games

Feb 2024 - Present | Karachi

- Promoted from Software Engineer to Senior Software Engineer for consistent delivery on core product features.
- Core/lead engineer on Raptr Wallet, a fintech platform serving 75,000+ users, and Raptr Store (gaming commodities e-commerce marketplace), using Node.js, Express, TypeScript, MongoDB, MySQL, Redis, Next.js, Tailwind CSS, and Redux.
- Built KYC workflows, JWT-based authentication, and idempotent payment webhooks for secure, reliable transaction processing.
- Built the admin portal from scratch, including CRUD operations, AI-powered features, and transaction & settlement reporting with graph-based analytics and role-based permission access; frontend built with Next.js, Tailwind CSS, SSR, Redux, and Context API.
- Developed a separate vendor portal for order and transaction tracking, complaint management, graph-based analytics dashboards, and team-based role permissions.
- Contributed to Raptr.gg, a platform for user registration, wallet creation, and esports tournament participation.
- Designed scalable MySQL/MongoDB schemas and developed RESTful APIs for authentication (JWT), payment gateways, and banking services.
- Built and exposed vendor/partner-facing APIs using Python FastAPI, and developed a PWA (mini-app) web application for vendor partners to integrate store services within their own apps.
- Deployed and monitored systems using Vercel and Google Cloud Console; implemented security with crypto encryption and Redis session handling; worked in an Agile environment using JIRA.

Full Stack Developer | WeUno Technologies

Apr 2022 - Jan 2024 | Karachi

- Designed and developed multiple frontend websites and admin panels using HTML, CSS, jQuery, React.js, Next.js, Bootstrap, Tailwind CSS, and Ant Design (SSR-enabled).
- Built backend web and admin panel RESTful APIs using Node.js, Fastify, Express, JWT, and Sequelize ORM; managed databases with MongoDB and MySQL.
- Integrated APIs using Redux state management and Context API.

Freelance Full Stack & Python Developer | Fiverr & Upwork

Sept 2020 - Present | Remote

- Completed multiple Python projects and GUI-based desktop applications using Tkinter.
- Designed frontend web UIs using HTML, CSS, jQuery, React.js, Next.js, and Tailwind CSS.
- Developed full-stack websites using React.js, Next.js, Flask, Node.js, Express, TypeScript, and MySQL; deployed with Vercel.

Frontend Developer Intern | Interns Pakistan

Oct 2021 - Nov 2021 | Remote

- Learned frontend web development fundamentals using HTML, CSS, and Bootstrap.

Web Developer Intern | Switch Studios

Sept 2021 - Oct 2021 | Karachi

- Worked on frontend web projects using HTML, CSS, and WordPress.
